Business/NP

**Pioneer Level Criteria
for Performance Excellence**

Effective December 2020

Note from the CEO:

Thank you for taking the time to consider applying for the Quality Texas Foundation Pioneer Level of Recognition (five-page Organizational Profile). This is the starting point for your organization or a section/group within an organization. Your next step is our Engagement Level of Recognition (five page Organizational Profile + 10 page application). Since this is probably your first entry with Quality Texas Foundation, welcome aboard. Remember this is a Journey, NOT a Destination.

It is our sincere hope that the questions embedded in the five-page Organizational Profile will cause your organization to evaluate exactly where you are, where you should be, and how you can significantly improve by prioritization of your improvement steps. The Baldrige Framework is used the world over to make systematic improvements to organizations. Proposed steps are shown below.

1) Assign a minimum of two personnel, preferably five to seven in your office to become Internal Coach/Examiners trained by the Quality Texas Foundation (see www.quality-texas.org/training for dates and locations). This training is where QTF teaches your personnel how to become valued Internal Coaches/Examiners by informing the participants how to respond/write the responses to the questions and the reasons behind the questions. QTF teaches the test! You can just begin writing if you like, but past information received from applicants indicate the Internal Coach/Examiner training was a major milestone in writing at any level. Our satisfaction rate over the past six years is 98.9%.

2) Write your responses to the questions and allow other people in your office to edit your work. Don't fall in love with your first draft. This application to be really effective will undergo several iterations with substantial improvements along the way. The application process will allow the organization to ask very difficult questions and address organizational priorities.

3) Revise multiple times and submit to QTF (www.quality-texas.org).

4) QTF is here to help! If you need assistance, QTF can provide you with coaching and with a customized writing seminar just for your organization

If QTF can be of assistance to you, please allow us that opportunity. QTF wants to be your go to source for Baldrige-based training and Category training. QTF has leadership development, organizational strategic planning, customer, service, information management and building a learning organization around data, workforce engagement training, and several others. Remember always that the Baldrige Journey is never finished! Happy travels!

Dr. Mac McGuire

Criteria for Performance Excellence

Begin with the Organizational Profile

The Organizational Profile is the most appropriate starting point for self-assessment and for writing an application. It is critically important for the following reasons:

- You can use it as an initial self-assessment. If you identify topics for which conflicting, little, or no information is available, use these topics for action planning.
- It sets the context for understanding your organization and how it operates and allows you to address unique aspects of your organization in your responses to the Baldrige Criteria questions in categories 1–7. Your responses to all other questions in the Criteria should relate to the organizational context you describe in this profile.
- It helps you identify gaps in key information about your organization and focus on key performance requirements and results.

Organizational Profile

The **Organizational Profile** is a snapshot of your organization and its strategic environment.

P.1 Organizational Description: What are your key organizational characteristics?

a. Organizational Environment

(1) Product Offerings What are your main product offerings (see the note on the next page)? What is the relative importance of each to your success? What mechanisms do you use to deliver your products?

(2) Mission, Vision, Values, and Culture What are your mission, vision, and values? Other than values, what are the characteristics of your organizational culture, if any? What are your organization's core competencies, and what is their relationship to your mission?

(3) Workforce Profile What is your workforce profile? What recent changes have you experienced in workforce composition or in your needs with regard to your workforce? What are

- your workforce or employee groups and segments;
- the educational requirements for different employee groups and segments;
- the key drivers that engage them;
- your organized bargaining units (union representation), if any; and
- your special health and safety requirements, if any?

(4) Assets What are your major facilities, equipment, technologies, and intellectual property?

(5) Regulatory Environment What are your key applicable occupational health and safety regulations; accreditation, certification, or registration requirements; industry standards; and environmental, financial, and product regulations?

b. Organizational Relationships

(1) Organizational Structure What are your organizational leadership structure and governance structure? What structures and mechanisms make up your organization's leadership system? What are the reporting relationships among your governance board, senior leaders, and parent organization, as appropriate?

(2) Customers and Stakeholders What are your key market segments, customer groups, and stakeholder groups, as appropriate? What are their key requirements and expectations for your products, customer support services, and operations, including any differences among the groups?

(3) Suppliers, Partners, and Collaborators What are your key types of suppliers, partners, and collaborators? What role do they play in producing and delivering your key products and customer support services, and in enhancing your competitiveness? What role do they play in contributing and implementing innovations in your organization? What are your key supply-network requirements?

Notes

P.1a(1). Product offerings are the goods and services you offer in the marketplace. Mechanisms for delivering products to your customers might be direct or might be indirect, through dealers, distributors, collaborators, or channel partners. *Nonprofit (including government) organizations might refer to their product offerings as programs, projects, or services.*

P.1a(2). If your organization has a stated purpose as well as a mission, you should include it in your response. Some organizations define a mission and a purpose, and some use the terms interchangeably. Purpose refers to the fundamental reason that the organization exists. Its role is to inspire the organization and guide its setting of values.

P.1a(2). Your values are part of your organization's culture. Other characteristics of your organizational culture might include shared beliefs and norms that contribute to the uniqueness of the environment within your organization.

P.1a(3). Workforce or employee groups and segments (including organized bargaining units) might be based on type of employment or contract-reporting relationship, location (including remote work), tour of duty, work environment,

use of certain family-friendly policies, or other factors. Organizations that also rely on volunteers and interns to accomplish their work should include these groups as part of their workforce.

P.1a(5). In the Criteria, industry refers to the sector in which you operate. Industry standards might include industrywide codes of conduct and policy guidance. *For nonprofit (including government) organizations, this sector might be charitable organizations, professional associations and societies, religious organizations, or government entities—or a subsector of one of these.* Depending on the regions in which you operate, environmental regulations might cover greenhouse gas emissions, carbon regulations and trading, and energy efficiency.

P.1b(1). The governance or oversight structure for privately held businesses, nonprofit organizations, and government agencies may comprise an advisory board, a family council, or local/regional leaders who are assembled to provide guidance. *For some nonprofit (including government) organizations, governance and reporting relationships might include relationships with major funding sources, such as granting agencies, legislatures, or foundations.*

P.1b(1). The Organizational Profile asks for the “what” of your leadership system (its structures and mechanisms). Questions in categories 1 and 5 ask how the system is used.

P.1b(2). *For some nonprofit (including government) organizations, customers might include members, taxpayers, citizens, recipients, clients, and beneficiaries, and market segments might be referred to as constituencies. For government agencies, the legislature (as a source of funds) may be a key stakeholder.*

P.1b(2). Customer groups might be based on common expectations, behaviors, preferences, or profiles. Within a group, there may be customer segments based on differences, commonalities, or both. You might subdivide your market into segments based on product lines or features, distribution channels, business volume, geography, or other defining factors.

P.1b(2). Customer, stakeholder, and operational requirements and expectations will drive your organization’s sensitivity to the risk of product, service, support, and supply-network interruptions, including those due to natural disasters and other emergencies.

P.1b(3). Your supply network consists of the entities involved in producing your products and services and delivering them to your customers. For some organizations, these entities form a chain, in which one entity directly supplies another. Increasingly, however, these entities are interlinked and exist in interdependent rather than linear relationships. The Criteria use the term supply network, rather than supply chain, to emphasize the interdependencies among organizations and their suppliers.

For additional guidance on this item, see the Criteria Commentary (<https://www.nist.gov/baldrige/baldrige-criteria-commentary>).

P.2 Organizational Situation: What is your organization's strategic situation?

a. Competitive Environment

(1) Competitive Position What are your relative size and growth in your industry or the markets you serve? How many and what types of competitors do you have?

(2) Competitiveness Changes What key changes, if any, are affecting your competitive situation, including changes that create opportunities for innovation and collaboration, as appropriate?

(3) Comparative Data What key sources of comparative and competitive data are available from within your industry? What key sources of comparative data are available from outside your industry? What limitations, if any, affect your ability to obtain or use these data?

b. Strategic Context

What are your key strategic challenges and advantages?

c. Performance Improvement System

What is your performance improvement system, including your processes for evaluation and improvement of key organizational projects and processes?

Notes

P.2a. *Nonprofit organizations must often compete with other organizations and alternative sources of similar services to secure financial and volunteer resources, membership, visibility in appropriate communities, and media attention.*

P.2b. Strategic challenges and advantages might be in the areas of business, operations, societal contributions, and workforce. They might relate to products, finances, organizational structure and culture, emerging technology, digital integration, security and cybersecurity, emerging competitors, changing stakeholder requirements, workforce capability or capacity, brand recognition and reputation, your supply network, globalization, and the environment and climate. *Throughout the Criteria, "business" refers to a nonprofit (or government) organization's main mission area or enterprise activity.*

P.2c. The Baldrige Scoring System uses performance improvement through learning and integration as a dimension in assessing the maturity of organizational approaches and their deployment. This question is intended to set an overall context for your approach to performance improvement. The approach you use should be related to your organization's needs. Approaches that are compatible with the overarching systems approach provided by the Baldrige framework might include implementing a Lean Enterprise System, applying Six Sigma methodology, using PDCA methodology, using standards from ISO (e.g., the 9000 or 14000 series, or sector-specific standards), using decision science, or employing other improvement tools.

For additional guidance on this item, see the Criteria Commentary (<https://www.nist.gov/baldrige/baldrige-criteria-commentary>).
